

Tester-Tee Harnessing from Ag-Tester

Tester-Tee harnessing connects the Ag-Tester HT101S and HT101V handheld for use in diagnostic processes. Two types of cables are available; "Stand-Alone" to bench check valves and sensors without a system controller, or "In-Line" for complete diagnostic testing of valves and sensors while installed in complete control systems.

In-Line harnesses rely on the display providing operational power to the valves or sensors, where stand-alone harnesses are powered by the HT101V or HT101S. When "bench testing" components use the "stand-alone" harnesses. Extensions are available. Primary cables are 2 foot in length.

The connectors used match RAVEN components with adapters used to fit additional manufacturers valves and sensors. Color coding is standardized allowing for adapters to be made by users.

HT101 Series Harnesses for Valves and Sensors

HT101V "IN-LINE" TT-AE27995

For VALVES

PRICE 215.00 US

HT101V "STAND-ALONE" TT-AE27996

For VALVES

PRICE 135.00 US

HT101S "IN-LINE" TT-AE27994

For SENSORS

PRICE 195.00 US

HT101S "STAND-ALONE" TT-AE27993

For SENSORS

PRICE 100.00 US

2 FOOT EXTENSIONS

HT101V VALVES TT-AE29991 PRICE 85.00 US

HT101S SENSORS TT-AE27992 PRICE 85.00 US
